

# Unrivalled experience unbeatable service

[www.tennantsdistribution.com](http://www.tennantsdistribution.com)

# A passion for excellence

Tennants Distribution Ltd is a leading independent distributor of chemicals. Based in the UK, we have an extensive network of strategically located depots providing a fast nationwide delivery service.

“Tennants  
is a leading  
UK chemical  
Distributor”

**The Tennant Group began in Glasgow in 1797 when Charles Tennant invented a stable process for bleaching cloth; a revolutionary process at the time, transforming the textile industry and leading to Tennants becoming a global chemical producer.**

Since that time the Tennant Group has developed into a successful, independent, chemical company, involved predominantly in the manufacture and distribution of chemicals. Today, the Tennant Group is one of the UK's leading chemical distribution companies, employing over 1000 people worldwide.

## **Distribution Specialist**

Chemical distribution is a vital component of the Tennant Group. Primarily focused on the UK and Ireland, our network of depots are ideally located to meet customer needs.

Currently, we are distributors for some of the world's largest chemical manufacturers, stocking over 2500 products. We add value for our customers by being able to offer a wide variety of products in packaging formats most appropriate to their needs including bags, drums, IBCs and bulk tanker quantities.

Through years of working in the chemical industry we have developed efficient supply chain solutions, vital to our customers and suppliers but also of great importance to external stakeholders and society. With increasing concerns relating to carbon emissions and sustainability, we seek to provide not only the most cost effective solution but also one that takes into consideration our impact on the environment.

# Tennants Locations

## Distribution and Production

"We offer solutions for suppliers and customers and provide links to other chemical alliances worldwide"

"We run our own fleet of vehicles ensuring a fast and efficient delivery service across the UK and Ireland"

## Distribution Depots

## Quality and Certification

With over 200 years of service experience, Tennants have developed supply chain solutions to the highest standard. We are proud of being certified to ISO 9001, FEMAS and the BRC Standard for Storage of ambient food chemicals and ingredients. We have a team trained in the principles of hazard and risk analysis (HACCP). We are also a leading advocate for Responsible Care in the UK.

We endeavour to maintain a very high standard in Health, Safety and Environmental practices. Our quality system allows us to pursue ever increasing standards of excellence, whilst being able to continually review and improve procedures.

Responsible Care

# Tennants Distribution - your ideal partner

Every day we supply and transport a vast and diverse range of chemicals, packaged to the individual requirements of our customers.

## Serving our customers

Our extensive range of products are used in most industrial sectors, including paint and coatings, food, pharmaceuticals, personal care, water treatment, detergents and metal finishing.

Our product list can be found in the back of this brochure although, we are continuously updating our portfolio and can source additional items on request through our global sourcing operation.

## Commodity chemicals

As distributors for many of the world's largest chemical manufacturers, Tennants offer an extensive and comprehensive range of liquid and dry products, including environmental chemicals. Through one of the largest networks of chemical distribution sites in the UK these products are supplied locally to over 100 types of industry.

## Solvents

Having the largest network of solvent packaging sites in the UK, we are one of the leading suppliers of solvents from global producers. Tennants supply a full range of oxygenated solvents and hydrocarbons, including alcohols, glycols, acetates and ketones. We also produce customer specific solvent blends.

## AdBlue®

AdBlue is produced by Tennants in the UK and used to reduce the Nitrous Oxide (NOx) levels of diesel engines and achieve environmental compliance. Supplied under our own brand name of Greenox® in both bulk and a variety of packaged options to suit vehicle and machinery operations of all sizes. Our total supply service includes advice on equipment and remote management of storage tank levels by GSM telemetry.

## Water treatment

Tennants supply many speciality products for the treatment of water, in addition to our large range of commodity chemicals. Products supplied to this industry include lime solution, ferric sulphate, ferric chloride, sulphuric acid, caustic soda, hydrochloric acid, sodium hypochlorite, phosphoric acid and polyaluminium chloride.

## Surfactants

Tennants are one of the leading distributors in the UK supplying a broad range of surfactant products. The portfolio includes a comprehensive range of amphoteric, anionic, cationic and nonionic surfactants.

## White Oil & Petroleum Jelly

Tennants supply a comprehensive range of white oils and petroleum jellies, for use in pharmaceutical, personal care, food and industrial applications.

## Oleochemicals

Having a long established relationship with the World's largest producer of natural fatty acids we supply a full range of products. Typical applications for these products include personal care, pharmaceutical and food.

## Formaldehyde

Using products manufactured within our Group, we are the UK's leading supplier of this range of products. We supply aqueous formaldehyde, paraformaldehyde and Alcoform®.

## Resins

Tennants supply a range of resins to meet customer's existing and developing specifications. Main product groups include synthetic polymers, hardeners, cross-linkers, biocides, film additives and film surface improvers.

We provide in-depth technical support, working with our customers in the areas of bespoke products, new technology, problem solving and use of products.

## Food ingredients

The Food Ingredients Division supplies products ranging from yeast derivatives and speciality starches, to complex products such as cyclodextrines.

The careful selection of quality manufacturers ensures that Tennants meets the demanding standards expected by this industry. In many instances, we also work closely with our customers in the research and development of new food formulations.

## Food Grade Chemicals

Complimentary to the food ingredients division is a range of food chemicals where we have warehousing facilities certified under BRC standard for storage of ambient food chemicals and ingredients.

## Vitamins and minerals

Our Speciality Additives Divisions supply a wide range of vitamins, minerals and supplements for use in food and animal feed.

## Export

Our Export Division supplies a wide range of chemicals, produced by the Group or sourced via our global procurement offices and long-established trading contacts.

Our team of multilingual staff are experts in handling international logistics, arranging bulk and packaged goods and in the transportation of hazardous and non-hazardous materials including all aspects of export documentation.

## Aroma Chemicals and Fragrances

We are the UK distributor for a range of aroma chemicals including acetates, salicylates and cinnamic aldehydes which can be used as components of perfumes and flavours within the food industry.

"If you have a particular requirement, or would like more information, please contact your local Tennants sales office"

# Tennants Distribution Product Listing

We would be pleased to offer additional products through our global sourcing operation.

## General Chemicals

Acetic Acid  
Acetic Anhydride  
AdBlue®  
Adipates  
Adipic Acid  
Alcoform  
Aluminium Powder  
Aluminium Sulphate  
Ammonia  
Ammonium Acetate  
Ammonium Bicarbonate  
Ammonium Bifluoride  
Ammonium Carbonate  
Ammonium Chloride  
Ammonium Persulphate  
Ammonium Sulphate  
Ammonium Thiocyanate  
Amyl Cinnamic Aldehyde  
Antifoams  
Antimony Sulphide

Barium Carbonate  
Barium Hydroxide  
Barium Nitrate  
Barytes  
Battery Acid  
Benzoic Acid  
Benzotriazole  
Benzyl Acetate  
Benzyl Salicylate  
Biocides  
Bleaching Powder  
Borax  
Boric Acid  
Britesil (Sodium Silicate powders)

Cadmium Oxide  
Calcium Carbonate  
Calcium Chloride  
Calcium Chloride solution  
Calcium Fluoride  
Calcium Formate  
Calcium Hydroxide  
Calcium Hypochlorite  
Calcium Nitrate  
Calcium Stearate  
Calcium Sulphate  
Calgon  
Capric Acid  
Caproic Acid

Caprylic Acid  
Caroat  
Caustic Potash  
Caustic Soda solutions  
Caustic Soda Pearl  
Chalk (French Talc)  
China Clay  
Chromic Acid  
Citric Acid  
Citric Acid solution  
Copper Carbonate  
Copper Pyrophosphate  
Copper Sulphate  
Cresylic Acid  
Crystal (Sodium Silicate solutions)  
Cyclohexane

Decanal  
Defoamers  
Demineralised Water  
Dextrose Monohydrate  
Diammonium Phosphate  
Diethanolamine  
Dimethyl Formamide  
Dipotassium Phosphate  
Disodium Phosphate  
Distilled Palm Fatty Acids

EDTA (and Sodium Salts)  
Epsom Salts  
Ethanolamines  
Ethyl Lactate

Fatty Acids  
Ferric Chloride  
Ferric Chloride solution  
Ferric Nitrate  
Ferric Sulphate  
Ferrous Ammonium Sulphate  
Ferrous Chloride solution  
Ferrous Sulphate  
Fluoroboric Acid  
Food Ingredients  
Formaldehyde  
Formic Acid  
French Chalk (Talc)  
Fumaric Acid  
Fumed Silica  
Furfuryl Alcohol

Glutaraldehyde  
Glycerine  
Gypsum  
  
Hexamine  
Hexyl Acetate  
Hexyl Cinnamic Aldehyde  
Hexyl Salicylate  
Humic Acid  
Hydrated Lime  
Hydrochloric Acid  
Hydrofluoric Acid  
Hydrogen Peroxide  
Hydrogen Peroxide -  
aseptic grade

Isopropyl Myristate  
Isopropyl Palmitate

Kaolin

Lactic Acid  
Lauric Acid  
Lime  
Liquid Paraffin  
Lithium Silicate

Magnesium Chloride  
Magnesium Nitrate  
Magnesium Oxide  
Magnesium Sulphate  
Maize Starch  
Maizorb  
Maleic Anhydride  
Malic Acid  
Manganese Sulphate  
Manganous Carbonate  
Melamine  
Mercaptans  
Metanitrobenzoic Acid  
Methacrylates  
Methylal  
Milk of Lime (High Solids)  
Monoammonium Phosphate  
Monochlorobenzene  
Monoethanolamine  
Monoisopropanolamine  
Monopotassium Phosphate  
Monosodium Glutamate  
Monosodium Phosphate  
Myristic Acid

Neutralac®  
Nickel Salts  
Nitric Acid  
NTA (and Sodium Salts)

Octanol  
Oleic Acid  
Oxalic Acid  
Oxone

Palmitic Acid  
Paraffin Wax  
Paraformaldehyde  
Paratoluene Sulphonic Acid (PTSA)  
Peracetic Acid  
Petroleum Jelly  
Phenyl Ethyl Acetate  
Phosphates  
Phosphonates  
Phosphoric Acid  
Phthalates

Pine Oil  
Polyaluminium Chloride  
Polyoxycarboxylic Acids (POCs)  
Polyvinyl Pyrrolidone  
Potassium Carbonate  
Potassium Chloride  
Potassium Fluoroborate  
Potassium Hydrogen Tartrate  
Potassium Hydroxide flake  
Potassium Hydroxide solution  
Potassium Nitrate  
Potassium Permanganate  
Potassium Persulphate  
Potassium Pyrophosphate  
Potassium Silicate  
Potassium Stannate  
Potassium Sulphate  
Potassium Triphosphate  
Propionic Acid  
Pyramid  
(Sodium Silicate powders)

Resins

Salicylic Acid  
Salt (all grades)  
Soap Flakes  
Soap Noodles

## General Chemicals continued

Soda Crystals	Sodium Methylate	Stannous Sulphate	Urea
Sodium Acetate	Sodium Molybdate	Stearic Acid	Urea solutions
Sodium Acid Pyrophosphate	Sodium Nitrate	Sulphamic Acid	
Sodium Benzoate	Sodium Nitrite	Sulphur	Veratraldehyde
Sodium Bicarbonate	Sodium Nitrobenzene	Sulphuric Acid	Vitamins
Sodium Bifluoride	Sulphonate	Surfactants	
Sodium Bisulphate	Sodium Perborate		Water Treatment Chemicals
Sodium Bisulphite	Sodium Persulphate	Tartaric Acid	Wetting Agents
Sodium Carbonate	Sodium Phosphate solution	Taurine	White Mineral Oil
Sodium Chlorate	Sodium Potassium Tartrate	Tetrahydrofuran	White Oil
Sodium Chlorite	Sodium Propionate	Tetrapotassium	White Soft Paraffin
Sodium Citrate	Sodium Silicates	Pyrophosphate	
Sodium Fluoride	Sodium Silicofluoride	Tetrasodium Pyrophosphate	Yellow Soft Paraffin
Sodium Formate	Sodium Stannate	Thiourea	
Sodium Gluconate	Sodium Sulphate	Thiourea Dioxide	Zinc Chloride
Sodium Hexametaphosphate	Sodium Sulphide	Titanium Dioxide	Zinc Nitrate
Sodium Hydrosulphite	Sodium Sulphite	TMT 15	Zinc Omadine
Sodium Hydroxide solutions	Sodium Thiosulphate	Triacetin	Zinc Oxide
Sodium Hydroxide pearl	Sodium Tripolyphosphate	Triethanolamine	Zinc Stearate
Sodium Hypochlorite	Solvents	Triethylamine	Zinc Sulphate
Sodium Metabisulphite	Stannine	Trisodium Phosphate	
Sodium Metasilicate	Stannous Chloride		

## Food Ingredients

Acetic Acid	Erythorbic Acid	Potassium Nitrate	Sodium Sulphite
Adipic Acid		Potassium Sorbate	Sodium Tripolyphosphate
Ammonium Bicarbonate	Fumaric Acid	Precipitated Silicas	Sorbitol
Ammonium Carbonate		Propionic Acid	Stearic Acid
Antifoams	Gelatine		
Ascorbic Acid	Glycerine	Rochelle Salt	Tartaric Acid
	Glycine		Tetrapotassium
Banana Ripening Fluid		Saccharin	Pyrophosphate
Benzoic Acid	Lactic Acid	Salt - all grades	Tetrasodium Pyrophosphate
	Linseed Oil	Sodium Acetate	Tricalcium Citrate
Caffeine		Sodium Acid Pyrophosphate	Tricalcium Phosphate
Calcium Carbonate	Maize Starch	Sodium Benzoate	Tripotassium Citrate
Calcium Chloride	Malic Acid	Sodium Bicarbonate	Trisodium Citrate
Calcium Sulphate	Menthol Crystals	Sodium Bisulphite Solution	Trisodium Phosphate
Caramel	Monopotassium Phosphate	Sodium Carbonate	
Carboxy Methyl Cellulose	Monopropylene Glycol	Sodium Citrate	Vanillin
Castor Oil	Monosodium Glutamate	Sodium Gluconate	
Citric Acid	Monosodium Phosphate	Sodium Hexametaphosphate	Xanthan Gum
Cream of Tartar		Sodium Metabisulphite	
	Phosphoric Acid	Sodium Nitrite	
Dextrose Monohydrate	Potassium Carbonate	Sodium Potassium Tartrate	
Dipotassium Phosphate	Potassium Chloride	Sodium Propionate	
Disodium Phosphate	Potassium Hydrogen Tartrate	Sodium Sulphate	

## Resins

Acrylic Bead Resins	Defoamers	Hardeners	Redispersable Powders
Acrylic Bead UV Reactive			Rheology Modifiers
Acrylic Emulsions	Epoxy Hardeners	Performance Enhancing	
Adhesion Promoters	Epoxy Resins	Additives	Silicone Additives
Alkyd Resins	Ethylene Copolymer	Polyester Additives	Solution Resins
Amino Crosslinking Resins	Emulsions	Polyvinyl Acetate Bead	Styrene Acrylic Copolymers
Antibacterial Agents	Ethylene Copolymer Powders	Polymers	
		Polyvinyl Ethylene Acetate	
Biocides	Flow and Levelling Additives	Reactive Diluents	
	Fungicide		

## Agriculture and Animal Nutrition

Acetic Acid	Ferric Chloride	Manganese Oxide	Salt
Ammonium Chloride	Ferric Sulphate	Magnesium Chloride	Sodium Bicarbonate
Ammonium Sulphate	Ferrous Sulphate	Magnesium Sulphate	Sodium Carbonate
	Folic Acid	Malic Acid	Sodium Hypochlorite
Benzoic Acid	Formaldehyde	Mono Propylene Glycol (MPG)	Sodium Molybdate
	Formic Acid		Sodium Sulphate
Calcium Chloride	Fumaric Acid	Nitric Acid	Sulphuric Acid
Calcium Formate			
Calcium Sulphate	Glycerine	Palmitic Acid	Urea
Caustic Potash Liquor		Peracetic Acid	
Caustic Soda Liquor	Hydrochloric Acid	Phosphates	Vitamins
Caustic Soda Pearl	Hydrogen Peroxide	Phosphoric Acid	
Choline Chloride		Potassium Carbonate	Zinc Oxide
Citric Acid	Inositol	Potassium Chloride	Zinc Sulphate
Copper Sulphate		Potassium Sulphate	
	Lime	Propionic Acid	
Dextrose Monohydrate	L-Tryptophan		

## Aroma Chemicals

Amyl Cinnamic Aldehyde	Hexyl Acetate
	Hexyl Cinnamic Aldehyde
Benzyl Acetate	
Benzyl Benzoate	Octanal
Benzyl Salicylate	
	Phenyl Ethyl Acetate
Decanal	
	Triacetin
