

**TENNANTS**  
DISTRIBUTION LTD

## **Flue Gas Treatment & Control Solutions**

***Delivering every element***

[www.tennantsdistribution.com](http://www.tennantsdistribution.com)

**Tennants deliver flue treatment chemicals that ensure environmental compliance, improve air quality and enhance your operational efficiency.**

## Industrial Emissions

**The latest emission legislation focuses on businesses that generate harmful NOx, SOx, particulates, acidic gases and organic pollutants.**

Companies that use Incinerators, Energy-from-Waste, Fossil Fuels, Biomass Power and Combined Heat & Power plants rely on Tennants to provide them with reagents to control these harmful environmental pollutants.

We are a leading provider of high-quality materials essential for emission control, offering a wide range of products to meet the most demanding legislation.

## Our Commitment to You

**Tennants technical expertise and decades of industry experience set us apart. Our technical sales team are equipped to tackle the most complex challenges and offer innovative solutions. Whether it's optimising your production process, or staying ahead of industry regulations, you can count on Tennants to provide the expertise and insight that drives your success.**

Our global buying power ensures that our customers can maintain efficient operations without interruption by securing healthy stock levels and reliable supply, while also benefiting from competitive pricing.

## Our Product Range

**Our extensive range of chemicals enables us to 'deliver every element' you need for flue gas treatment.**

- Activated carbon
- Ammonia Liquor
- Caustic Soda Liquor
- Neutralac Lime Solutions
- Sodium Bicarbonate
- Sodium Carbonate
- Urea Solutions

We ensure the safe delivery of industrial chemicals through our own fleet of HGV vehicles, backed by a national network of depots storing both bulk and packaged products, enabling us to meet all your requirements anywhere in the UK.

Partnering with world-leading manufacturers, we offer a diverse portfolio of products allowing you to source a full range of emission control solutions from a single trusted provider. Furthermore, our in-house compliance team continuously monitors health and safety, as well as environmental regulations guaranteeing that each product is delivered to you for optimal performance and full compliance.

## What We Bring to the Market

**Urea Specialists - AUS32 - 32.5% / AUS40 - 40% / Urea Prills**

For industrial applications equipped with SCR (Selective Catalytic Reduction) or SNCR (Selective Non-Catalytic Reduction) we can supply 32.5% Urea solution (commonly known as AdBlue®), or the concentrated 40% Urea solution (AUS40) to achieve more efficient deliveries. This 40% solution is specifically designed for use in heavy duty applications and can be delivered at a regulated temperature to ensure optimum performance of the storage and abatement system.

Trading under the Greenox® brand Tennants operate 3 wholly owned UK production facilities located in Glasgow, Manchester and Oldbury.

With over 2000mt of finished-product storage capacity, we can boast nationwide distribution capabilities, supplying anywhere in the UK and when you need it. With a comprehensive production and supply experience in the HGV SCR market since 2005, we can tailor storage and dispensing systems for new installations and assist with upgrading to bulk supply from packaged products.

We can also offer service and maintenance packages fitted with the Greenox REACT™ telemetry system, ensuring your bulk storage tanks are inventory managed and have constant supply whilst reducing the logistical carbon footprint.

Our strong and longstanding relationships with leading producers ensures that we can provide a reliable supply and help our industrial clients maintain uninterrupted operations, whilst our position as a leading supplier in the Urea market ensures that we secure competitive pricing.

Whether for Nox abatement, chemical manufacturing, or other industrial applications, our extensive network and expertise make us a trusted partner in the Urea supply chain.

## Choose Tennants Distribution and Greenox®

### Expertise – Trusted Leadership

Tennants Distribution's boasts decades of industry experience. Our team delivers expert guidance and tailored solutions, ensuring you get the most out of our products.

### Quality – Independently Tested

Our commitment to excellence means all Greenox® products undergo independent testing. This guarantees they meet the highest standards of quality, compliance, and performance, giving you confidence in every purchase.

### Support – Nationwide Coverage

With our extensive UK network, we offer unmatched support and efficient deliveries throughout the UK. Whether you need technical assistance or swift product delivery, a member of the Tennants' team are ready to assist.

### Sustainability – Forward-Thinking Solutions

We are committed to sustainability, leading the way with cutting-edge technologies in flue gas treatment. Stay ahead of regulations and protect the environment with our innovative, eco-friendly solutions.

For more information on our products and how they can benefit your operations, please visit our website or contact our sales team. Together, we can make a significant impact on reducing emissions and protecting the environment.
